- JAVASCRIPT

Experience:

Student Trainee | CODE IN PLACE 2021

Company Name

Stanford University Trainee

Dates Employed Apr 2021 – May 2021

Employment Duration 1 mos

CS106A is one of the most popular courses at Stanford University, taken by almost 1,600 students every year. Where we worked on the karle's project. It has been developed over the last 30 years by an amazing team, including Nick Parlante, Eric Roberts, and more. The course teaches the fundamentals of computer programming using the widely-used Python programming language.

Project:

- Scientific calculator | Jan 2021

Created and implemented a scientific calculator using the object oriented programming in c++ language successfully. In these project we mainly used Operator Overloading for the calculation. In future onwards we are going to include more concept of OOps in this project. It is also on my github profile

("https://github.com/Yash7903/METVY_project/blob/main/Source.cpp").

➤ Simon Game | May 2021

Created a simon game using HTML, CSS and Javascript successfully. Javascript is plays a main role in this project where click and keypress events is used for working of the function.

➤ Weather web page | July 2021

Created a web page where we have to enter the current location and it will give all the information of that city. Using Nodejs I have created this site and by using API of the site "OpenWeatherMap" from which I get information about weather information.
